TCARE

TCARE: Trail Castlegar Augmented Response: Enhancing supportive services for persons and family living with life-limiting chronic illness

What is TCARE?
TCARE is a solutions oriented, community based, research project seeking to improve quality of care and quality of life for persons and families living with life-limiting chronic illness in the Greater Trail and Castlegar region.

TCARE provides support and information for patients and families who have agreed to participate in the research and have registered for the service.

It is available 24 hours per day, 7 days a week.

GOAL OF TCARE
The project goal is to construct and evaluate a sustainable, rural, community based model of supportive care for those living with life-limiting illness.

DURATION OF TCARE
Project length is 3 years. Interested research participants (patients and families) can be registered on the service in 2012 and with support services commencing 2013 and 2014. Anticipated project extension 2015 to 2020.

HOW CAN YOU BE INVOLVED?
By referring individuals to TCARE @ 250-512-7721 – TCARE Intake
